CHLOE BELLE ESTILO

SOFTWARE ENGINEER | PROJECT MANAGER | AI-ASSISTED ENGINEERING WORKFLOWS

chloebelle.connect@gmail.com +63 9496651088 Iloilo City, Philippines

ABOUT ME

Frontend-focused Software Engineer experienced in building web and mobile apps with React, Next.js, React Native, TypeScript, and Expo. Brings a strong mix of software engineering, business analysis, and project management, with hands-on use of AI-assisted workflows, Figma MCP, and Atlassian/Jira MCP to speed up planning, ticket writing, documentation, debugging, and product delivery.

KEY COMPETENCIES

- PROJECT MANAGEMENT
- AGILE PRACTICES
- SCRUM MASTER
- FRONTEND DEVELOPMENT
- USER INTERFACE DESIGN
- FIGMA PROFICIENCY
- BUSINESS ANALYSIS
- INTRAPERSONAL SKILLS
- STAKEHOLDER COMMUNICATION

TECHNICAL SKILLS

FRONTEND & MOBILE:

React, React Native, Next.js, Flutter, Expo, Tailwind CSS, MUI (MaterialI-UI), Bootstrap

LANGUAGES:

TypeScript, JavaScript, Python, Dart

BACKEND & DATABASE:

Node.js, Express.js, Feathers.js, Native.js, Supabase, PostgreSQL, MongoDB, MySQL, Prisma

DESIGN & PROTOTYPING:

Figma, Canva, Filmora, Lucidchart, Pixlr, Draw.io

PROJECT MANAGEMENT

Jira, Notion, Asana, ClickUp, Monday.com, Trello, Teamwork, Taiga

TOOLS & TECHNOLOGIES

Arduino, Docker, Postman, Jest, GitHub, GitLab, VS Code

AI-ASSISTED ENGINEERING & PRODUCT WORKFLOWS

- Built **Speckit-based AI workflows** that convert project charters and Figma designs into Jira tickets, subtasks, acceptance criteria, design references, and team allocation plans.
- Created reusable story templates and AI skills connected with **Figma MCP** and **Atlassian/Jira MCP** to read design flows, attach Figma references, and push structured work items to Jira.
- Used AI-assisted workflows to speed up planning, documentation, task breakdown, frontend handoff, and delivery coordination.

EXPERIENCES

ASSOCIATE SOFTWARE ENGINEER | PROMETHEUS

- Full-time software engineer working across multiple web and mobile projects, contributing to frontend development, UI/UX implementation, requirements clarification, testing support, and feature delivery.
- Built mobile features using React Native, TypeScript, and Expo, and supported internal and event-based web projects.

FRONTEND DEVELOPER | MYSCHOOL PLATFORM

- Built frontend and authentication features for Admin, Teacher, and Parent user flows.
- Used Speckit, AI-assisted code generation, Jira MCP, and Figma MCP to accelerate platform scaffolding, ticket writing, design reading, and documentation.
- Created custom AI skills, prompts, and ticket templates to improve requirements breakdown, task clarity, and sprint planning.
- Supported sprint review demos, pre-QA testing, and frontend issue fixes across school slips, store modules, and parent access flows.

PROJECT MANAGER | HK-BASED COMPANY

- Managed project delivery activities and coordinated app preparation for App Store and Play Store release.
- Managed multilingual translation workflows and supported communication across project contributors.

BUSINESS ANALYST | TITO SOLUTIONS

- Engaged in client and stakeholder meetings to clarify needs, project scope, and expected system behavior.
- Analyzed business requirements and translated them into documentation, process flows, and team-ready tasks.
- Managed project timelines and supported coordination across UI/UX, development, and QA teams.
- Led platform documentation initiatives, including onboarding content, system behavior guides, and process documentation.

FULL STACK DEVELOPER | UI/UX DESIGNER | KINGSLAND UNIVERSITY (INTERNSHIP)

- Designed the website UI/UX in Figma and developed a MERN stack corporate database for employee records, leave requests, and internal administrative data.
- Used React.js, TypeScript, MongoDB, and GitLab for frontend development, database management, and version control.

PROJECT MANAGER | FRONTEND DEVELOPER | DESTAMP (Mobile App)

- Capstone mobile app focused on budget-based travel itinerary generation.
- Designed the app UI/UX in Figma and built mobile features using React Native, TypeScript, and Expo.
- Used Supabase and Prisma for backend data handling while managing project planning, feature coordination, and app build preparation.

FRONTEND DEVELOPER | UI/UX DESIGNER | TECHGO COMPANION (Mobile App)

- Developed an LGU startup event companion app that matched participants based on shared business interests, helping them form groups for pitching and startup collaboration.
- Designed the UI/UX in Figma and built the app using Flutter, Dart, Supabase, and GitHub.

EDUCATION

BS Software Engineering | Central Philippine University | 2020 - 2024
